Devaangini Mehta

Frontend Engineer | Angular · TypeScript · Fintech

devaangini04@gmail.com | +91 6283411585 | linkedin.com/in/devaangini-mehta-4775ab1a3 | Noida, India

PROFESSIONAL SUMMARY

Frontend Engineer with 4.5+ years building high-performance Angular applications for fintech platforms serving 150M+ users and processing 3B+ transactions annually.

Cut page load times by 60% through targeted performance engineering, while independently owning feature delivery from requirements to production across Digital Wallet, Lending, and Core Banking modules.

Mentors junior engineers and integrates AI-assisted tooling (GitHub Copilot, Claude Code) into daily workflow to ship faster without compromising quality.

PROFESSIONAL EXPERIENCE

Software Engineer | Happiest Minds (formerly PureSoftware), Noida, India *May 2024 – Present*

Working on Arttha — a cloud-native, API-first Banking-as-a-Service (BaaS) platform powering 150M+ users and processing 3B+ annual transactions across 20+ global markets.

- Independently owned and delivered new features across Digital Wallet & Payments, Loan Lifecycle Management, Core Banking, BNPL, and Merchant & Partner Payments modules — driving end-to-end delivery from requirement scoping to production release
- Reduced page load times by 60% by implementing OnPush Change Detection strategy and optimizing rendering for data-heavy financial screens
- Architected and maintained reusable component libraries using Angular Material and PrimeNG, standardizing UI patterns across 15+ modules and eliminating duplicate component work across teams
- Engineered RxJS reactive data flows to reliably handle high-concurrency, real-time banking scenarios
- Implemented key modules within the Micro-frontend architecture, enabling independently deployable feature teams and reducing inter-team delivery dependencies
- Integrated 30+ complex RESTful APIs to power dynamic, real-time dashboards and transaction workflows across banking modules
- Resolved 30+ critical UI bugs, resulting in a 50% improvement in user satisfaction scores and a 40% increase in customer engagement
- Partnered with Product Owners and UX teams in Agile/Scrum sprints to translate business requirements into scalable frontend solutions
- Mentored 3–5 junior developers — conducted code reviews, resolved blockers, and enforced coding best practices across the team
- Partnered with backend engineers on Java-based services to align REST API contracts, enabling seamless cross-team integration
- Adopted AI-assisted development tools (GitHub Copilot, Claude Code) into daily workflow for code reviews, debugging, and feature delivery

Frontend Engineer | PureSoftware, Noida, India *Jul 2022 – May 2024*

- Owned feature delivery across Angular-based modules on the Arttha Digital Banking Platform prior to PureSoftware's acquisition by Happiest Minds
- Built foundational component libraries, RESTful API integrations, and reactive data flows that were carried forward and scaled after the transition to Happiest Minds

Engineer Trainee | PureSoftware, Noida, India *Jan 2022 – Jun 2022*

- Developed and optimized scalable UI components with accessibility best practices (semantic HTML, keyboard navigation, ARIA attributes) for the Arttha Digital Banking Platform using Angular (15+) and Angular Material across 15+ modules
- Applied REST API integration, modular code structuring, and frontend optimization techniques to support platform development

KEY PROJECTS

Flexipay — Digital Payments & Mobile Money Platform

A comprehensive digital payments platform built on Arttha, enabling peer-to-peer transfers, merchant payments, bill payments, and wallet top-ups with multi-currency support.

- Led frontend development of core payment flows including fund transfers, bill payment modules, and transaction history dashboards
- Built and maintained 10+ reusable Angular components across transaction and wallet modules, reducing duplication and accelerating feature delivery
- Engineered high-scale transaction UX capable of handling 69M+ transactions annually with 124K+ merchants onboarded to the ecosystem

Loan Origination System — End-to-End Digital Lending Solution

An automated digital lending platform covering the complete loan lifecycle — from application and KYC verification to credit scoring, approval workflows, and disbursement.

- Developed dynamic multi-step loan application forms with complex validation, conditional field rendering, and real-time field-level error handling
- Built credit assessment and loan approval workflow UI integrated with backend decision-engine APIs, enabling automated lending decisions for 5M+ customers
- Contributed to enabling USD 120M+ in loan disbursements through performant, user-centric lending journeys

TECHNICAL SKILLS

Frontend Frameworks: Angular (15+), TypeScript, JavaScript (ES6+), HTML5, CSS3

State Management & Reactivity: NgRx, RxJS, reactive programming patterns

Architecture: Micro-frontend architecture, component-based architecture, modular design, OnPush Change Detection

UI Libraries: Angular Material, PrimeNG, Bootstrap, Tailwind CSS

API & Integration: REST API integration, JSON-based integrations, asynchronous programming

Accessibility: Semantic HTML, keyboard navigation, ARIA attributes

Backend Exposure: Java (Spring Boot basics), Node.js (familiarity)

DevOps & Tools: Git, GitHub, Bitbucket, CI/CD (familiarity), Agile/Scrum

AI & Productivity: GitHub Copilot, Claude Code, AI-first development workflows

Testing: Unit testing, code reviews, component testing

ACHIEVEMENTS

- Employee of the Month — Awarded 4 times for outstanding performance, attention to detail, and delivery excellence at PureSoftware / Happiest Minds
- 60% improvement in page load times through Angular performance optimization techniques
- 50% improvement in user satisfaction scores through critical bug resolution and UX enhancements
- 40% increase in customer engagement through Agile collaboration and feature refinement

EDUCATION

Bachelor of Technology — Electronics & Communication Engineering
Thapar University, Patiala, India | 2018 – 2022
